

Public Alert: Keep Canada a Sovereign Nation

Dear fellow Canadians,

Unbelievable as it seems, it is true: Canada is poised to lose its sovereignty to the United Nations' World Health Organization (WHO) in May 2024 when amendments to the *International Health Regulations* (IHR) go into effect without a debate in our Parliament. The WHO will then become an **unelected** legislative authority with extraordinary powers to make decisions about our way of life and health, negatively impacting our individual and national sovereignty.

Canadian citizens have launched a petition demanding our House of Commons to act. Please read it, sign it, and share it widely:

<https://petitions.ourcommons.ca/en/Petition/Details?Petition=e-4623>

Also found at: www.CanadianPetition.com

Key facts:

- Surprisingly, all world governments and the mainstream media including Canada's have been silent. This silence will result in the **transition of powers from democratically elected institutions to private unelected entities** driven by their own agendas who influence the WHO and the UN.
- According to the WHO membership rules, the IHR **amendments are accepted by default**, unless a member country **explicitly** rejects them. This means that **inaction by Canada equals Canada's consent to losing our nation's sovereignty!**
- All WHO member countries are affected. **Citizens in many countries have also started petitions** calling their governments to exit the WHO and the UN in order to retain their sovereignty. However, because of the mainstream media silence, **many people are still unaware.**
